

# DISH Note

## DishSkinz Uncovered

Audience: DNS Technicians

Release Date: 08/09/07

### Overview

Starting August 15th, customers will be able to enhance the appearance of their dish with a DishSkinz.

DishSkinz are mylar molded satellite covers currently designed to fit a DISH 500 or a DISH 1000.2. These covers are available in a variety of sports logos, and colorful designs.

### Special Considerations

- We will not set up trouble calls or service calls to install or service DishSkinz.
- We are not responsible for damaged or defective DishSkinz.
- DishSkinz are only available for the DISH 500 and DISH 1000.2.
- If DishSkinz are installed properly, they should not affect the signal strength.

### Technician Notes

- DishSkinz will come packaged with four installation clips.
- You won't need to stock DishSkinz in your van, they will be shipped directly to customers before their scheduled installation dates.
- Soon, additional clips will be available to order. Carry a few spares in your van incase any are lost or damaged.

### Installation Instructions

**Important\*** Attach the DishSkinz to the dish before climbing a ladder and mounting the dish. Do not mount the DishSkinz while on a ladder.

Installing a DishSkinz should only take a few minutes, just follow the steps below.

1. Make sure you are wearing the proper PPE (personal protective equipment).
2. Center the DishSkinz over the dish antenna, adjust if from left to right to make sure it is flush.
3. Using your fingers, attach the four clips evenly around the dish (two prongs facing outwards as shown in the image).
