

# Initial Hopper Setup (after wiring node and dish)

- 1) Do not unbox Joeys until all Hoppers show live TV.
- 2) Start by connecting coax from wall outlet to the first Hopper and power up.
- 3) If message 015 shows up first then go into the menu and reset to factory defaults using troubleshooting guide.
- 4) Wait for Receiver Setup Wizard to show up.
- 5) Pair Remote by pressing sat button and then press pair button.
- 6) Name Location of Hopper.
- 7) Click Next to get Hopper to start software download.
- 8) After Software Download, receiver will reboot showing starting up screen.
- 9) If you have a second hopper, you can set it up at this time.
- 10) Setup resolutions of Hopper.
- 11) Now the whole system including Joeys can be activated by the installer.
- 12) You should now see live TV on all hopsers.
- 13) If you encounter any other problems or the Hopper appears to get stuck in any step, follow troubleshooting guide
- 14) Now that all Hoppers are successfully showing live TV, you can unbox and setup one Joey at a time.
