SENT VIA FCC SCFS

Kevin J Martin
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: IB Docket No. 05-72 - ECHOSTAR - RAINBOW

Dear Chairman Martin,

This letter is being written on behalf of the 26,000 plus members of SatelliteGuys.US, which is the United States largest forum for satellite and communication enthusiasts in regards to the pending transfer of DBS frequencies and control of the RAINBOW 1 Satellite from Rainbow L.L.C. to Echostar L.L.C.

SatelliteGuys.US is urging the FCC to APPROVE this transaction on the basis that this transaction will be good for American consumers and will offer consumers new services including expanded HDTV offerings.

However we also ask that the FCC grant Dominion Satellite Video, Inc. the two 61.5 transponders made available by the "Auction 52" order, so that Dominion may also expand their offering to their SkyAngel customers.

We feel that by granting both of these applications would benefit all consumers able to receive the 61.5 orbital location. It has been over the normal 180 timetable normally given in these sorts of transactions and we urge the FCC to expedite the approval process so both companies can begin to offer more services to it's customers.

On behalf of our 26,000 plus members we would like to thank you in advance for your swift and wise decision on this matter.

Very truly yours,

Scott Greczkowski
