My son Evan. I miss you son.

OK. I am happy to report that there is now a factory fix for the AC3 on the Solomend 800 HD.

I have tested it personally just this morning and it works!.

Now the bad news is that because the manufacturer had to pay for the Dolby Digital liscence they will require a small fee to activate the AC3, for each receiver that has been sold.

I imagine at some point in the future they will include this in the boxes from the factory, and just raise the price for dealers like me for a few bucks, but I don't know that for sure.

Here is how it works:

1) You must load the 6/18 factory file. This contains the authorization works for AC3 << but will not get you AC3 audio until activated.

One note: This file contains all the Euro sats E2.0 to W 15.0. I am trying to get an America file from the factory. You will lose all your sat/channel info if you do this upgrade and you wont be able to go back to the America's file from 3/25. You will have to manually add America sats or use the Sat Editor Tool.

2) You must then go to << menu << tools << information and record the receiver info carefully. Like this:

MAC - 00-18-BD-5A-1A-62
Machine - 06-07-01-01-00-00-00
NC - 39-d4-6a-8b-e3-42-11-92
Version - HDS2-10-06-18:021ECMT

3) You then email that info for me along with the activation fee of \$5.00

4) I then send you a new file from the factory that you must flash, this file activates the AC3 audio for your receiver only.

As of right now that activation file i send you will also have European sats in it.

Thats it, you now can decode AC3 audio right to your tv, no stereo hookup required.

I tested it all out this morning.

I first scanned 101.0W AMC 4 without the fix and tried History and Bio in AC3 (ENC11 AC3, ENC 12 AC3).

No audio of course.

I then loaded the 6/18 factory file, then the activation file for my box, added 101.0W manually, did a blind scan, and walla! AC3 audio right to my tv.

I did this using an old analogue tv set using RCA video/audio connections to be 100% sure.

If anyone wants to do this upgrade just let me know.

I will try to get it going with the America sats but for now it has to be just like i explained above.

Kudo's to the maker of Solomend for fixing an issue for us.

My son Evan, taken from his family and friends, hit by a truck on March 26, 2010 at the age of 15, 3 days after his birthday. We love you and miss you Evan. We will see you again soon in heaven. I miss you son. You were the best son a dad could have. I am so proud of you. Save a place for me.

so they send another file that will work on your box?

should I **not** continue to put America sats in the latest (no AC3) file ?

only to have to do it again

You will lose all your sat/channel info if you do this upgrade and you wont be able to go back to the America's file from 3/25. You will have to manually add America sats or use the Sat Editor Tool.

You can add or change any Solomend satellite file using the AZ channel editor. It takes less than a minute to put a different satellite file on any past or present Solomend .abs file using this editor. You can also move complete channel files from one .abs file to another.
If you are in need, I would be glad to upload a 618 file that contains the U.S. satellites later this evening. EB
